Contents

VOLUME 31 NUMBER 1

1 British Society for Plant Pathology
5 Editorial

7 *P. H. Gregory. Plant Pathology*, E. C. Large and phytopathometry
9 *J. Rishbeth.* Species of *Armillaria* in southern England
19 *B. D. L. Fitt, M. Lysandrou and R. H. Turner.* Measurement of spore-carrying splash droplets using photographic film and an image-analysing computer
25 *P. M. Hyde.* Temperature-sensitive resistance of the wheat cultivar Maris Fundin to *Puccinia recondita*
31 *R. H. Priestley and Rosemary A. Bayles.* Effect of fungicide treatment on yield of winter wheat and spring barley cultivars
39 *D. J. Penn and J. M. Lynch.* The effect of bacterial fermentation of couch grass rhizomes and *Fusarium culmorum* on the growth of barley seedlings
45 *P. R. Scott, P. W. Benedikz and Cheryl J. Cox.* A genetic study of the relationship between height, time of ear emergence and resistance to *Septoria nodorum* in wheat
61 *F. Croke and C. Logan.* The effect of humidity on potato gangrene development in naturally contaminated tubers
65 *T. M. O'Neill and J. W. Mansfield.* The cause of smoulder and the infection of narcissus by species of *Botrytis*
79 *M. S. Wolfe and D. R. Knott.* Populations of plant pathogens: some constraints on analysis of variation in pathogenicity

New or unusual records

91 *D. R. Humphreys-Jones. Phoma exigua* on *Ginkgo biloba*

95 Book reviews
97 Note for electron microscopists

VOLUME 31 NUMBER 2

99 British Society for Plant Pathology

101 *T. M. O'Neill, J. W. Mansfield and G. D. Lyon.* Aspects of narcissus smoulder epidemiology
119 *A. E. Arinze and I. M. Smith.* Distribution of polygalacturonase, total phenolic substances, polyphenol oxidase and peroxidase in rot zones in sweet potato
123 *A. Lam and G. C. Lewis.* Effects of nitrogen and potassium fertilizer application on *Drechslera* spp. and *Puccinia coronata* on perennial ryegrass (*Lolium perenne*) foliage
133 *Talma Katan.* Resistance to 3,5-dichlorophenyl-N-cyclic imide ('dicarboximide') fungicides in the grey mould pathogen *Botrytis cinerea* on protected crops
143 *C. J. Rawlinson, G. Muthyalu and G. R. Cayley.* Residual effects of triadimefon in soil on powdery mildew and yield of spring barley

157 *Jennie A. Whiteway, T. J. W. Alphey, P. L. Mathias and J. F. Southey.* Computer mapping of records of beet cyst nematode (*Heterodera schachtii*), 1928–77

163 *J. F. Southey, T. J. W. Alphey, D. A. Cooke, Jennie A. Whiteway and P. L. Mathias.* Surveys of beet cyst nematode in England 1977–80

171 *G. J. Jellis.* Laboratory assessments of the susceptibility of potato tubers to gangrene (*Phoma exigua* var. *foveata*)

179 *A. O. Latunde-Dada and J. A. Lucas.* Variation in resistance to *Verticillium* wilt within seedling populations of some varieties of lucerne (*Medicago sativa*)

New or unusual records

187 *G. V. H. Jackson and I. D. Firman.* Seedborne marasmioid fungi of coconut

189 Book review

190 Note for electron microscopists

VOLUME 31 NUMBER 3

191 British Society for Plant Pathology

Letter to the Editor

193 *R. J. Scheffer.* On toxins and aggressins

195 *C. A. Macfoy and I. M. Smith.* Degradation of maackiain by a cell-free extract from *Sclerotinia trifoliorum*

201 *R. J. Cook and T. Naiki.* Virulence of *Gaeumannomyces graminis* var. *tritici* from fields under short-term and long-term wheat cultivation in the Pacific Northwest, U.S.A.

209 *L. Sundheim.* Control of cucumber powdery mildew by the hyperparasite *Ampelomyces quisqualis* and fungicides

215 *S. J. Eden-Green.* Further studies on root symptoms in coconut palms affected by lethal yellowing disease in Jamaica

221 *A. Alavi, R. N. Strange and G. Wright.* The relative susceptibility of some cucurbits to an Iranian isolate of *Phytophthora drechsleri*

229 *D. R. Jones, D. S. Ingram and G. R. Dixon.* Factors affecting tests for differential pathogenicity in populations of *Plasmodiophora brassicae*

239 *D. R. Jones, D. S. Ingram and G. R. Dixon.* Characterization of isolates derived from single resting spores of *Plasmodiophora brassicae* and studies of their interaction

247 *R. B. Maude, Judith M. Bambridge and A. H. Presly.* The persistence of *Botrytis allii* in field soil

253 *D. G. A. Walkey, C. Creed, H. Delaney and J. D. Whitwell.* Studies on the reinfection and yield of virus-tested and commercial stocks of rhubarb cv. Timperley Early

261 *Fiona G. A. Bennett and B. Westcott.* Field assessment of resistance to powdery mildew in mature wheat plants

New or unusual records

269 *D. M. Glen. Syndemis musculana* (Hübner) (Lepidoptera: Tortricidae), a new leaf roller attacking apples in the United Kingdom

273 *D. R. Humphreys-Jones.* Leaf blotch of potato caused by *Botrytis cinerea*

277 Book reviews

285 Note for electron microscopists

VOLUME 31 NUMBER 4

287 British Society for Plant Pathology

289 *S. J. Eden-Green*. Detection of corn stunt spiroplasma *in vivo* by ELISA using antisera to extracts from infected corn plants (*Zea mays*)

299 *D. B. Archer, R. Townsend and P. G. Markham.* Detection of *Spiroplasma citri* in plants and insect hosts by ELISA

307 *D. R. Walters and P. G. Ayres*. Translocation of ^{14}C-labelled photoassimilates to roots in barley: effects of mildew on partitioning in roots and the mitotic index

315 *W. Fitzgerald and B. M. Cooke.* Response of wheat and barley isolates of *Septoria nodorum* to passage through barley and wheat cultivars

325 *R. A. C. Jones.* Breakdown of potato virus X resistance gene Nx: selection of a group four strain from strain group three

333 *C. H. Dickinson and H. Singh.* Colonization and sporulation of *Peronospora viciae* on cultivars of *Pisum sativum*

343 *G. W. Beakes, H. Singh and C. H. Dickinson.* Ultrastructure of the host-pathogen interface of *Peronospora viciae* in cultivars of pea which show different susceptibilities

355 *Desirée L. Cole.* Interactions between *Cercospora arachidicola* and *Phoma arachidicola*, and their effects on defoliation and kernel yield of groundnut

363 *M. J. C. Asher, I. A. Cowe, C. E. Thomas and D. C. Cuthbertson.* A rapid method of counting spores of fungal pathogens by infra-red reflectance analysis

373 *S. M. Kluczewski and J. A. Lucas.* Development and physiology of infection by the downy mildew fungus *Peronospora parasitica* (Pers. ex Fr.) Fr. in susceptible and resistant *Brassica* species

New or unusual records

391 *J. V. Cross and P. Bassett.* Damage to tomato and aubergine by broad mite, *Polyphagotarsonemus latus* (Banks)

395 Book reviews

397 Note for electron microscopists
